

# ULTRA SHIELD BURNISHING FORMULA

ARMOR TECHNOLOGY FOR YOUR FLOORS

**Ultra Shield®**  
Armor Technology For Your Floors

## Cut Overhead & Labor Up to 50%

Traditionally, floor care has been a labor-intensive process. Service contractors continually apply floor finish, spray buff, strip, and completely refinish floors as often as three times a year.

ULTRA SHIELD will change the way you maintain floors forever. Simply mop ULTRA SHIELD over any high quality sealer or floor finish and burnish to a mirror shine with any ultra high speed machine. It's that easy, and economical. Because ULTRA SHIELD eliminates the need for as many as seven regularly used products. Now just one product simplifies your operation, saves labor, and cuts costs.

## A Better Way to a Beautiful Floor

How many times have you broken your back stripping and refinishing and wondered "There's got to be a better way!" With ULTRA SHIELD, there is!

ULTRA SHIELD is the amazing cleaning and protective product that virtually eliminates stripping forever. Simply mop ULTRA SHIELD over any well prepared floor and burnish with an ultra high speed machine for a glossy "wet look" shine with superior slip resistance.

Regular maintenance with ULTRA SHIELD removes dirt, black heel marks, scuffs, and scratches. ULTRA SHIELD is compatible with any sealer or finish and will not discolor or build-up with frequent usage

ULTRA SHIELD is an amazing professional floor protection product recommended for all high traffic retail and commercial environments.

ULTRA SHIELD will strengthen all acrylic floor finishes and produce durability never before imagined. It has been proven in the field to create a lustrous "wet look" shine that is non-slip and very safe.

Regular high speed buffing with ULTRA SHIELD produces a barrier that insulates the floor from the floor pad. The result is a floor finish which is 20-30 times more durable and safer than ever before.

- Low Maintenance**
